Putting the Surgical Team in Control of Focus & Illumination

The Lumos surgical light is the latest LED innovation to the Skytron lighting portfolio. This next-generation surgical light puts enhanced clarity and focus in the clinician's hand. Utilizing our [best-in-class reflective LED technology](#), Lumos provides ideal illumination with [optimal shadow control](#).

Personalization

The Lumos surgical light brings crisp, deep-cavity illumination to any procedure with three spot sizes. With sixty combinations of spot size, color, and intensity, this focusable light is sure to impress any surgeon. By utilizing the ten presets, Lumos creates efficiency and lowers set-up time and frustration.

Focusable

Controlling the focus from the sterile handle eliminates the need to reposition the lighthead up or down. The focal point adjusts according to the surgical team's preference — with only one twist of the sterile handle.

Intuitive Control

Lumos' flush-mounted wall control allows you to choose spot size, color temperature, intensity, and control the in-light surgical camera with a simple touch on the LCD screen.

Technology

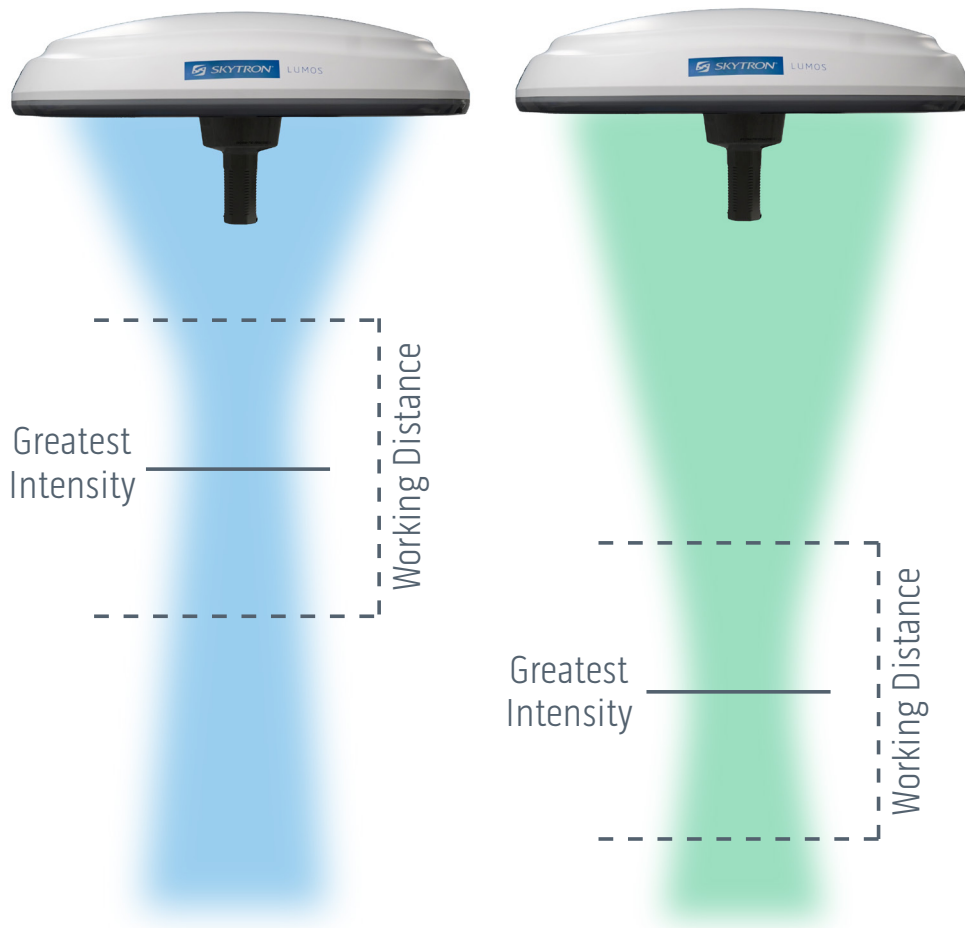

Intuitive
Control

Controlling spot size, color temperature, light intensity, and the camera from one intuitive control panel makes case setup easy and fast. Up to ten presets maximizes efficiency for the team.

Direct Focus: Less Movement, More Control

Adjust focus without moving the lighthead – one twist of the handle moves the focal point up or down and can be utilized at all 3 spot sizes.
