Blanket & Fluid Warming Cabinets

Accelerate patient recovery time and reduce surgical site infections by maintaining normothermia from admission to discharge. Designed to thoroughly heat and maintain IV fluids, irrigation fluids, and blankets to healthcare or manufacturer temperature guidelines, Skytron's broad range of warming cabinet configurations also meet storage, space, and application requirements throughout a facility.

Simplify tasks and enhance convenience with choices of remote temperature monitoring, touch screen control, or glass doors for visualization. Our touchscreen option offers unparalleled technology by allowing remote connectivity to a warmer (via computer or smartphone app) and giving you control of a warmer wherever you are. The cabinets are available in single and dual-chamber units.

Warming Cabinets

Standard Model

Optional Glass Door and Touch Screen

Skytron Blanket & Fluid Warming Cabinets provide independent, digitally controlled heating chambers that offer actual temperature and set point displays. Data is recorded every 30 minutes and stored for up to two years.

The Ethernet option offers unparalleled technology by allowing remote connectivity to your warmer (via computer or smart phone app) and giving you control of your warmer wherever you are.

Stainless Steel Sinks

Work hands-free with our standard knee-kick control on our stainless scrub sinks. Preset water temperatures are dispensed automatically and the aerator can be adjusted to provide either a stream or rosette spray. Skytron sinks are built to last with our high-quality stainless steel throughout the entire structure, reducing the risk of corrosion or deterioration overtime. This efficient design lengthens product life while lowering the total cost of ownership.

Surgical Scrub Sinks

SS-Series

The SS-Series is our premier line of surgical scrub sinks. These sinks combine the best material, components, and craftsmanship available on the market today.

Streamline™ IV Suspension System

FROM THIS → TO THIS

- Patient transport requires up to three or more caregivers and often multiple IV poles to manage patient equipment.

- One Caregiver
- One Infusion Suspension System
- Safe, Fast, Efficient

New Thinking Solves Age-old Patient Transport Problem

Streamline Pole — Instantly connects to a patient's bed. The base and legs rise off the floor with the push of a foot pedal for smooth, hands-free transport over uneven floors, elevator thresholds, etc.

The Articulating Bed Mount — Secures the Streamline pole to the bed, freeing attendants' hands for faster, safer maneuvering around tight spaces and corners. The mount's 180-degree swing allows for multiple transport positions.

In seconds, the IV Suspension System can go from an infusion stand to a suspended, securely locked part of any bed or stretcher.

Contact your local distributor for more info or how to order Streamline
